Why is CCTV Important?

The Facts

Acts as a Visual Deterrent

It has been found that home CCTV systems have the largest crime deterrent effect in pre-planned crime. Burglars want an easy break-in and will be deterred from a home that appears highly protected. 60% of burglars look for a CCTV system and 40% of those then go on to choose another target. Make sure your CCTV camera is visible and stop your home being a specific target for burglary.

Can Help Identify Criminals

CCTV footage can also help to identify criminals and be used as evidence in criminal investigations. Whether for anti-social behaviour near your property or a full-on break-in, a major benefit of having CCTV at home is that offenders are more likely to be identified, caught and brought to justice.

Monitor Your Home Remotely

A major benefit of home CCTV is that you can monitor footage and your home from anywhere remotely. Devco Engineering's CCTV systems give access to your CCTV system from any desktop, tablet or mobile phone over a secure internet connection, so that you can keep on top of any activity from anywhere in the world.

Why is CCTV Important?

The Facts

Provides Peace of Mind

Home CCTV can provide great peace of mind to you and your family, knowing that you have taken the extra precautions to enhance your safety. This is particularly important when you are away from your property or on holiday. Knowing that your home is being monitored is a major benefit that can justify whether it's worth installing CCTV at home.

Home CCTV cameras can be set up around the perimeter of your home and give visual access to any blind spots, which can be viewed without you leaving your property. Another great benefit is being able to see who is at your front door without having to answer it – a great feature for more vulnerable people such as the elderly.

Cost-Effective

Home CCTV systems are incredibly cost-effective, especially when no-one can put a price on protecting your loved ones. From wired to wireless, monitored or unmonitored, there is an option for all budgets.

Devco Engineering provides smart CCTV security that is designed and installed to suit your individual needs. The smart application provided gives you full control with live-stream footage, recorded footage and event notifications.

Which System is Right for You?

Wired vs Wireless

Home Security

A wireless system is more than sufficient for home security but for those who want more advanced features and 24/7 recording, a wired system is necessary.

Industrial/Farming/Livestock

A wired system will provide you with reliable 24/7 recording with a consistent high video quality. There is no need to worry about battery life or a stable WiFi connection.

	Wireless	Wired
24/7 Recording Don't miss anything with recording around the clock.	-	✓
Event Based Recording Record short video clips when an event is triggered. E.g., motion.	✓	✓
Power Options Power your device using various methods.	<ul style="list-style-type: none">• Solar Panel• Battery Powered	<ul style="list-style-type: none">• Continuous Power
2-way Audio Communicate with someone at your door or in your garden.	✓	✓
Event Trigger Zones Only receive the alerts that matter. Customize the area in which detection takes place to suit your home.	✓	✓
Human and Vehicle Detection Reduce false alerts with software that can differentiate humans and vehicles from objects.	✓	✓
Strobe Light Alarm Once activated, strobe lights startle an intruder into looking directly at the camera meaning you can capture their face.	-	✓

Wireless CCTV System

The Camera

2K Resolution

When it comes to security, the key is in the detail. See exactly what is happening in and around your home in crisp 2K clarity.

365 Day Battery Life

Avoid frequent trips to charge the battery and enjoy up to 365 days of battery life from just one charge.

Advanced Night Vision

The F2.0 aperture lens and high photosensitivity sensor allow for more light to be captured and for the total surface area monitored to be increased.

Built to Withstand the Elements

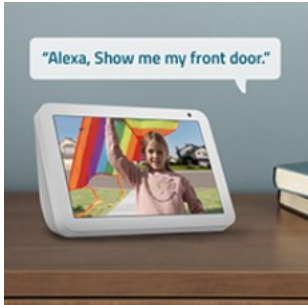

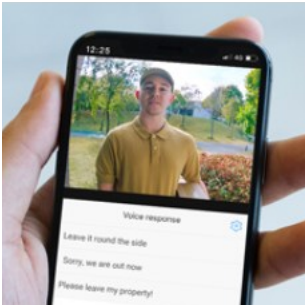

With an IP67 weatherproof-rating, the camera is built to withstand the elements.

Wireless CCTV System

The Doorbell (Optional)

Customised Detection	"Hey Alexa, show me my front door"	Respond in Real-Time	Interaction Made Easy
			
<p>Draw an Activity Zone to customise the area in which motion is detected.</p>	<p>Connect your Doorbell to Google Voice Assistant or Amazon Alexa and check what's going on outside your home.</p>	<p>Speak directly to anyone who approaches your front door via two-way audio.</p>	<p>Record and set up to 3 instant responses. When you are notified of activity simply select a response to interact/give instructions.</p>

Note

The doorbell is an optional extra and so are an additional cost to the prices provided.

Wireless CCTV System

Solar Panels (Optional)

Solar-Powered Continuous Charging

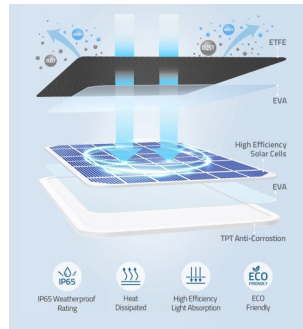

The 2.6W high-efficiency solar panel means that with just a few hours of direct sunlight every day, your camera will stay charged around the clock.

IP65 Weatherproof

Built to withstand extreme weather conditions.

No Need To Charge Batteries

With a solar panel installed for each camera, there is no need to manually charge them providing hassle free security.

Maximum Efficiency

The 13ft (4m) cable allows for flexibility when choosing the location of your solar panel and ensures it can get maximum sunlight exposure.

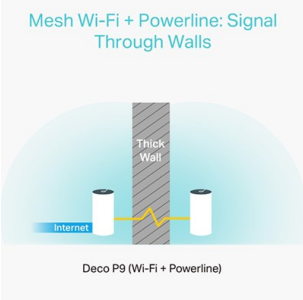

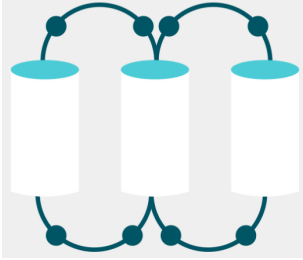

Note

These solar panels are an optional extra and so are an additional cost to the prices provided.

Wireless CCTV System

WiFi Mesh

Bypass Thick Walls	WiFi Dead-Zone Killer	Seamless Roaming with One WiFi Name	Self-Healing
 <p>Mesh Wi-Fi + Powerline: Signal Through Walls</p> <p>Deco P9 (Wi-Fi + Powerline)</p>			
<p>Powerline connections utilise your home's electrical circuit to link each access point, bypassing even the thickest of walls and ceilings.</p>	<p>Eliminate weak signal areas with a single WiFi network that covers every corner of your home with seamless roaming, adaptive routing and self-healing.</p>	<p>All access points work together to form one unified network. Your phone or tablet automatically connects to the fastest access point as you move through your home, creating a truly seamless WiFi experience.</p>	<p>If one access point has an issue, the system will automatically reroute data via the other access points to make sure you stay online.</p>

Note

These access points will be provided within the cost of the package on houses with 3 bedrooms or more.

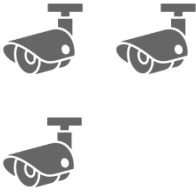

3-4 Bedroom houses will include 2 access points in the package.

5+ Bedroom houses will include 3 access points in the package.

More can be purchased at an additional cost should they be required.

Wireless CCTV System

How Much?

		Number of Cameras		
				
Building Size	 1-2 Bedrooms	£506	£660	£859
	 3-4 Bedrooms	£659	£813	£1012
	 5+ Bedrooms	£731	£884	£1084

Optional Extras

Doorbells are priced at £122 each.
 Solar Panels are priced at £50 each (1 required per camera).
